

# Trevor Jones

**Independent for Boothby**

I have a vision of seeing Australia governed by people who act for the good of all Australians, with honesty, integrity and accountability. People who listen and aren't controlled by a party. I am standing to represent you.

**VOTE 1 for Trevor Jones**

# A PERSON, NOT A PARTY

I will listen and act without compromise for the people of Boothby

## Independent Voice for Boothby

The parties have failed to serve for our good. They have failed our environment, failed to care for those in need, and failed to treat people with respect. They focus on getting power and have lost integrity. Our politicians are compromised by their party allegiance.

I have lived and raised my family in Boothby over the last 33 years. I am free from party control and able to listen to and truly represent the people of Boothby.

## Respect and Fairness

Everyone is important and deserves respect, care and safety. Everyone. Justice and fairness for all is vital.

Let's build a healthy community together, where each of us are valued. Let's enable our sporting, social and community groups to flourish.

We can control our borders and maintain our dignity by treating others how we would like to be treated.

## Better Economy for All

As a director of a small business for 7 years I understand the needs and challenges of business. To make Australia better we need to support small business and lessen the gap between the rich and the poor by not allowing the huge corporations and the extremely rich to exploit the system.

We can then ensure quality health and education and provide adequately for those in need with liveable wages and pensions.

I have a BSc and work in software and project management.

I am an active walk leader for Adelaide Bushwalkers.

For a chat, or to get involved, call me on 0468 520 560

## Sustainable Environment

I am a passionate bushwalker and have led community groups on walks in our parks, along our coast, and far afield, for many years. I've learnt that our environment is a precious thing that needs to be cared for in a sustainable way for our future.

Our environment is currently being harmed. We must protect it and reduce our greenhouse gas emissions for both our own and future generations.
